Court House
Paoli, Indiana 47454

Gentlemen:

Re: Approval of Proposal
Sanitary Landfill Operation
NW 1/4 of the NW 1/4 of the NW 1/4
Section 25, R.1W., T.2N., Orange County

You are hereby notified that the State Health Commissioner of the State of Indiana has this 3rd day of March, 1971, approved the proposal for the operation of a sanitary landfill at the above-referenced location.

This project will include the trench method of sanitary landfill operation. Refuse will be deposited, compacted and covered at the end of each day's operation with at least six inches of earth. The final cover will be at least two feet in depth.

This approval is given with the following conditions:

1. That all garbage and refuse be disposed of in a manner to prevent contamination of ground water and pollution of surface waters.
2. That no burning of wastes be conducted at the sanitary landfill site.
3. That no liquid, hazardous chemical, smoldering or hot ash wastes be deposited at this sanitary landfill site.
4. That, if nuisance or pollution conditions are created, immediate corrective action will be taken by the operator.
5. That all necessary local permits, including zoning, be obtained prior to any operation.

Orange County Commissioners

March 3, 1971

6. That the operation of the sanitary landfill be conducted in accordance with the "Standards for Selection, Operation and Maintenance of a Sanitary Landfill," adopted by the Division of Sanitary Engineering, Indiana State Board of Health. (A copy is enclosed.)
7. That no scavenging or salvaging be permitted at this site.
8. That the final cover be provided from a layer of impervious soil with a minimum slope of one percent.
9. That construction of semi-public sanitary facilities meets the approval of the State Board of Health.
10. That this approval be renewed upon any change in ownership or operating contractor.
11. That a portable fence be used to control blowing paper and that such paper be picked up and buried daily.
12. That proper provisions for surface drainage be made to prevent washing or eroding of the fill and to prevent surface water contamination.

This proposal was prepared by Paul R. McBride, R. P. S., Lawrence County Health Department, and submitted on February 19, 1971.

This approval shall be void if operation is not begun before April 1, 1972.

Sincerely,

A. C. OFFUTT, M. D.
STATE HEALTH COMMISSIONER
INDIANA STATE BOARD OF HEALTH

Enclosure

Approval No. SW 48
